

BEFORE YOU PRESS PLAY

CALL • WAIT • CLEAR • ENABLE

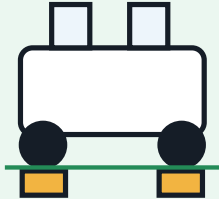

Never assume everyone knows the robot is about to move.

Complete every step before enabling motors or moving mechanisms.

1

SECURE THE ROBOT

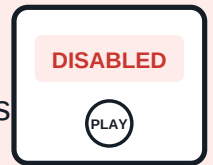

Use stable safety blocks. Keep driven wheels and moving mechanisms off the table and floor.

2

CONFIRM DISABLED

Select the correct robot and OpMode. Do not press PLAY. The operator controls the Driver Station.

3

LOOK AROUND

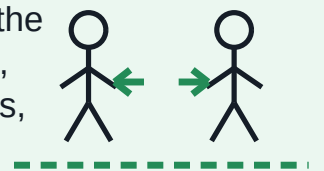

Remove hands, tools, wires, scraps, and loose objects from every moving area.

4

MAKE SURE ALL ARE CLEAR

Everyone steps outside the safety zone. Secure hair, clothing, lanyards, strings, and jewelry.

CALL IT OUT LOUDLY

“POWERING ON!”

5

WAIT - LET PEOPLE MOVE

Pause. Give everyone time to stop, look up, and step away.

6

VISUALLY CONFIRM - THEN ENABLE

Scan the full area again. Press PLAY only if everyone and everything is clear.

ANYONE MAY CALL “STOP!”

DISABLE IMMEDIATELY • KEEP HANDS OUT • FIX THE HAZARD • RESTART THE SEQUENCE

AFTER TESTING: DISABLE BEFORE ANYONE APPROACHES THE ROBOT

BUILD SMART • SPEAK UP • STAY SAFE
